

GIOVANNI DI ANTONIO

Mr. Di Antonio graduated in Aeronautical Engineering and Astronautical Engineering at University of Rome "La Sapienza" in 1998.

After some years spent in Helicopters and Defense industry, in 2006 joined the Italian Civil Aviation Authority (ENAC) as Airworthiness Certification Expert. Since then he has been involved in many National and European aircraft type certification projects as European Aviation Safety Agency (EASA) Expert.

He is also the Italian Focal Point of the Joint Authorities for Rulemaking on Unmanned System (JARUS) where he deals, in particular, with airworthiness and operations issues. He is presently member of the Italian ENAC team in charge of developing the commercial space regulatory framework in Italy.
